## COVER LETTER

---

To the recruiter,

My name is Nur Mohammad Rashed, and I am excited to submit my application for the Frontend Developer position in your company. Based on my experience as Frontend Developer at Nordfin Capital Group, I believe I could be a good fit for your team.

Throughout my career, I have had the opportunity to work with various projects in the Fintech Industry and gained extensive experience in crafting responsive and user-friendly web interfaces. I am good at HTML, CSS, JavaScript, TypeScript, and I'm also proficient in frontend frameworks, including React, Next.js, Angular and Vue.JS. My role in restructuring and rebuilding Nordfin's invoice management platform was a significant achievement, resulting in a 35% increase in users within a couple of months across multiple countries.

I am excited about joining your team to further improve my skills in frontend development and contribute to the success of your company. The opportunity to work on challenging projects and collaborate with talented professionals greatly motivates and excites me. I am confident that my ability to work independently from any stage of a project's lifecycle, ability to collaborate with cross-functional teams, ability to perform well in a fast-paced environment, constant hunger for success, attention to detail, and dedication to excellence make me an ideal fit for this position.

I'd love to learn more about the role and share more about my own qualifications. Furthermore, I am also available to join in short notice and ready to relocate. I look forward to hearing from you.

Best regards,

Nur Mohammad Rashed
